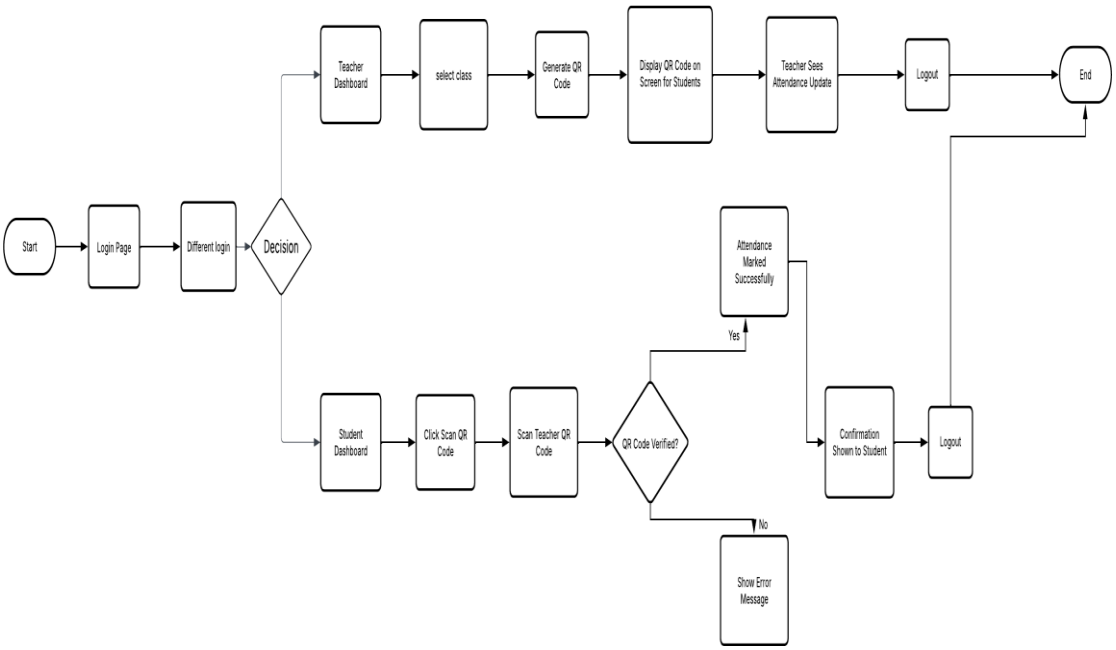
EXPERIMENT NO : 5

NAME : SABARIPRABU.M ROLL NO : 240701446

Create a task analysis for an app and document user flows . Create corresponding wireframes

USER FLOWS :



Steps of User Flow :

- This system Start with the User's Login .
- Users have a different login belongs to their roles
    - Teachers Login
    - Students Login

- Teachers Login :

  - Teachers have a separate login page
  - After login successfully , Teacher can select their respective class
  - They can generate the QR code for the attendance
  - QR code has been display on Screen for students
  - Later the process finish Teacher can vew the Attendance updates
  - After this all they can able to logout , thus the teacher flows ends

- Student Login :

  - By the way of Teachers Login, Students have a separate logins
  - Students can Scan the QR displayed by the teacher
  - After Scanning the QR , it automatically mark the attendance in the database
  - And attendance confirmation shown to the user
  - If the time limit reached or any other error occur , Shows an error message
  - Like teacher login , in this after all process user can log out
    Then the flow ends.
