EXPERIMENT NO : 8

Name : Sabariprabu.M Roll No:240701446

Create storyboards to represent the user flow for a mobile app

Storyboard Flow Explanation :-

Screen 1: User Concern

The student realizes they need leave for a few days and thinks about checking attendance and schedule.

Screen 2: Open Application

The student opens the attendance app from their mobile device.

Screen 3: Dashboard View

The app displays a dashboard with:

- Welcome message
- Academic progress overview
- Menu options

Screen 4: Navigation Menu

The student clicks the menu and sees options:

- Attendance History
- Timetable
- Calendar

Screen 5: Check Attendance

The student selects Attendance History:

- Subject-wise attendance percentage is displayed
- Helps in deciding whether leave can be taken

Screen 6: View Timetable

The student navigates to the Timetable:

- ❖ Shows daily class schedule
- ❖ Helps identify important classes

Screen 7: Calendar Check

The student opens the Calendar:

- ✓ Selects specific dates
- ✓ Confirms leave duration

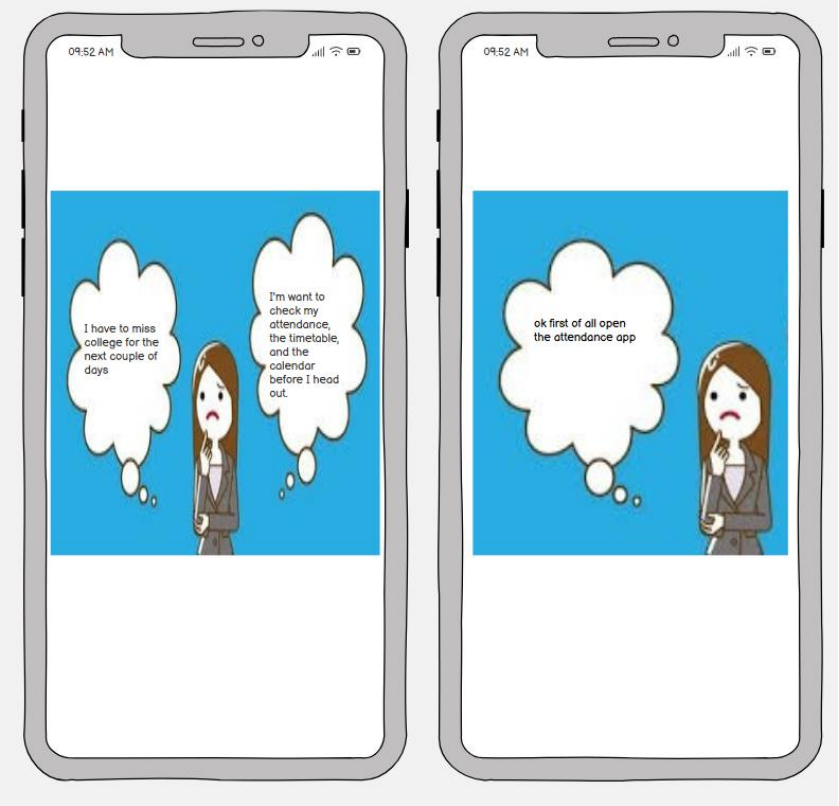
Atlast Decision Making :

After reviewing all information:

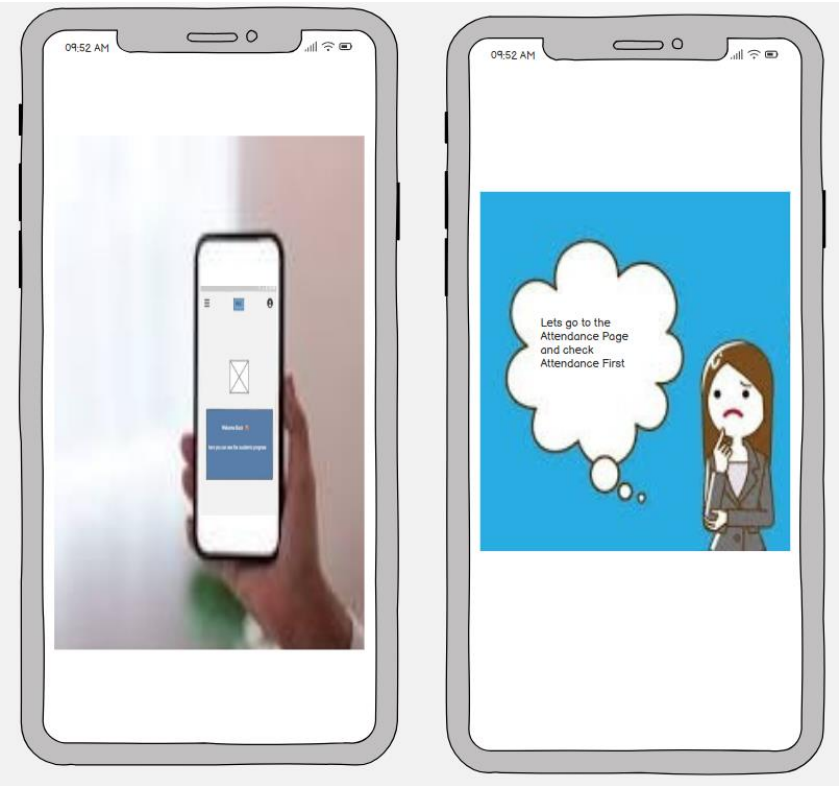
- ➢ Attendance is sufficient
- ➢ Schedule is manageable
- ➢ Dates are confirmed

The student decides to proceed with leave planning.

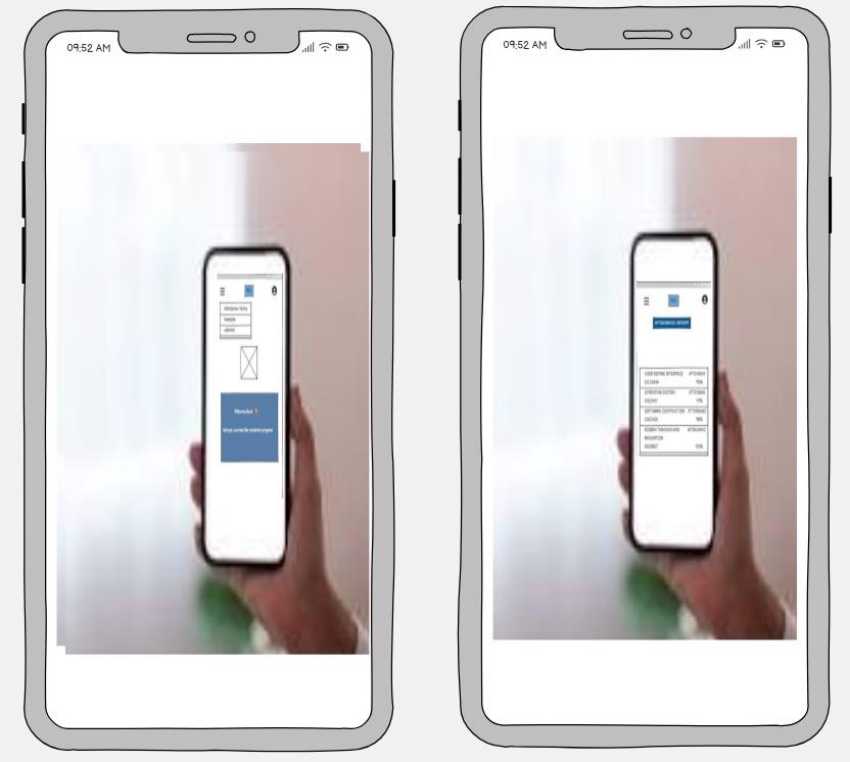
SCREENS :



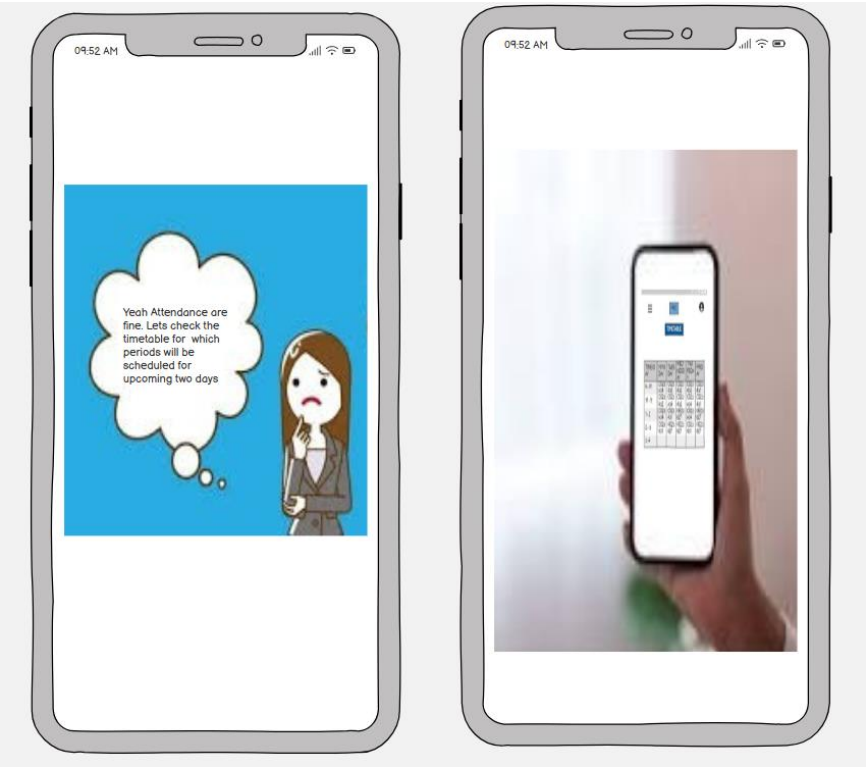
09:52 AM
I have to miss college for the next couple of days
I'm want to check my attendance, the timetable, and the calendar before I head out.
09:52 AM
ok first of all open the attendance app



09:52 AM
09:52 AM
Lets go to the Attendance Page and check Attendance First



09:52 AM
09:52 AM



09:52 AM
Yeah Attendance are fine. Lets check the timetable for which periods will be scheduled for upcoming two days
09:52 AM
